Easy to Use GUI Allows Full Config of Each Stream. Control boots quickly from Flash Drive and remembers all settings. Transcoder, scaler, and streamer. Based on Embedded Linux®, RF receiver, and MPEG-2 to H.264 or Optional H.265. High definition (up to 1080p), integrated DVB-S and DVB-S2. Broadcast quality, multichannel (8 RF), real time, standard or high definition (up to 1080p), integrated DVB-S and DVB-S2 RF receiver, and MPEG-2 to H.264 or Optional H.265.

**Features**

- Supports HLS (adaptive) for output to mobile devices
- Inputs: DVB-S or DVB-S2 – Simultaneously receives transport streams from up to eight satellite transponders. Option for decryption available.
- IP input (H.264, MPEG-2, or VC-1): UDP, RTP, RTSP, HTTP, HTTP Live, RTMP (pushed from Flash server)
- Supports NewTek™ NDI® input
- IP output protocols: UDP, RTP, RTMP (Open Flash), HTTP, with DLNA support
- Supports logo insertion, text overlay, and SCTE 35 compliant cue tone insertion ("ad markers") on outputs
- Supports rotating key servers like Verimatrix® VCAS™
- Performs AES-128 encryption
- Supports 50 HLS users natively. Optional built-in server supports 1,000+ simultaneous HLS, DASH, and/or RTMP users.
- Transcoding bit rates: .1 Kbps to 15 Mbps
- Creates simultaneous High, Medium, and Low bitrate streams
- Supports 1080i, 1080p, 720p, 576i, 480i, and 480p and any other broadcast or video format
- Simultaneous demodulation, transcoding, and encapsulation
- Transcodes up to 20 720p60 HD streams, or 13 1080i/p HD streams, or 52 streams from MPEG-2 to H.264, or vice-versa
- Optional H.265 transcodes are up to 5 720p HD streams, or 3 1080i/p HD streams, or 20 SD streams from MPEG-2 or H.264 to H.265, or vice-versa
- SNMP, REST, SOAP support for remote management and monitoring
- Support for Variable Bit Rate (VBR) encoding maximizes adaptive streaming video quality and bandwidth efficiency
- Tested to work with Atlas™, Wowza®, and Adobe® Flash® media servers
- Tested to work with Akamai, Tulix, Verizon, etc. CDN's
- Tested compatible with major brands of IP devices including Amino™, Roku®, Telergy, Android™, and Apple iPad® and iPhone®
- Tested compatible with major brands of professional H.265, H.264, and MPEG-2 decoders and video servers
- Audio support: AAC, MPEG-1 Layer II, optional MP3, and/or optional “SurCode for Dolby Digital” AC-3
- Settings are remembered when power cycled
- Options for DVB-T2, HD-SDI, ASI, 8VSB, and QAM inputs
- Remote GUI includes some scheduling
- Redundant power supply

**Overview**

The Gearbox™ DVB-S-S2 8 Tuners/IP is a real time multichannel integrated RF receiver and transcoder designed to receive up to eight simultaneous satellite signals and transform them into streams that are best suited for customers. It is designed to be scalable, easily adaptable, and field upgradeable to meet the needs of cable and IP network operators who are very comfortable with embedded Linux® based appliances. It relies on an Intel® 16 Core CPU as an accelerator. We have also optimized the transcode engine for reliability, efficiency, and flexibility.

The Gearbox DVB-S-S2 8 Tuners/IP is an MPEG-2 to H.264 transcoder or transcoder. It receives multiple satellite services, transcodes them to H.264 or optional H.265, and outputs them to an IP network. Resulting streams can be viewed with standard transport stream compatible set-top boxes, streaming video, smart phones, or software clients such as VLC or JW Player. The Gearbox DVB-S-S2 8 Tuners/IP receives transport streams, demultiplexes the requested channels and streams these channels using UDP, RTP, RTMP, Adaptive, or HTTP via IP networks as either IP multicast or IP unicast streams. The system transcodes individual streams into H.264 format up to a maximum individual bitrate of 15 Mbps.

The Gearbox DVB-S-S2 8 Tuners/IP selects all required PID's and demultiplexes the demultiplexed transport stream packets into IP packets.

The unit provides PID filtering of all unwanted traffic, increasing system performance and the number of channels which can be transmitted per unit.

Programs typically are forwarded (pushed) as transport stream packets via UDP or as RTP (real time protocol) payload (RFC 2250). Pushing can be either unicast or multicast. In addition to push, programs can be forwarded on request (pulled) using HTTP, HTTP Live, RTMP, DASH, etc.

**Applications**

- IPTV head end to feed CDN’s
- Telco TV ingest to VOD and DLNA
- Hotels, Cruise Lines, Universities, Resorts feeds
- Streaming to designated VideoLAN VLC or similar clients, or to Roku®, Amino™, or other set-top boxes
### Input/Outputs

**Specifications**

<table>
<thead>
<tr>
<th>Supported Resolutions – Input and Output</th>
</tr>
</thead>
<tbody>
<tr>
<td>1920 x 1080</td>

</tbody>
</table>

Also supports any custom resolution not listed here, including computer formats like 1280 x 1024, etc. Note: Lower resolution results in higher transcodes. Supports PAL TO NTSC conversion but not NTSC to PAL. Supports closed captioning. H.265 output resolutions supported are 1080, 720, 576, 480. H.265 576/480 resolutions only have 4:3 aspect ratio.

#### DVB-S/S2 Input

- **Modulation:** QPSK (DVB-S), 8PSK (DVB-S2), 16APSK (DVB-S2)
- **Inputs:** 8 Inputs – L-Band, K-Band, Ku Band, etc.
- **Symbol rate:** 1 to 45 Ms/s
- **Frequency range:** 950 to 2150 MHz, 70 to 1002 MHz
- **LNB control:** 22 kHz, power H/V
- **Spectral inversion:** ON/OFF/AUTO
- **Maximum raw throughput:** 400 mbps

#### IP Input

#### IP Output

- **Audio Output:** AAC, MPEG-1 Layer II, optional MP3, and/or optional “SurCode for Dolby Digital” AC-3
- **Ethernet:** Two GigE, optional 10 GigE
- **Output “wrappers”:** UDP, RTP, RTMP (Open Flash), HTTP, with DLNA support
- **Type:** IP-multicast, IP-unicast with “wrappers”
- **Bit Rates:** Multiple H.264 video streams at different bit rates (.1 to 15 mbps), resolutions, and protocols, wrappers, and containers
- **Optional H.265:** H.265 average bit rate supported. No constant or variable.
- **Quality:** 8 bit encoding with 4:2:0 color sampling; optional 4:2:2
- **Video:** NTSC or PAL
- **Latency:** About 1.2 seconds (fixed)

#### Administration

- **Access:** Web interface, SSH (Secure command line interface)
- **SNMP:** Monitoring and alerts
- **Scheduling:** On, Off support for timeslots

#### CPU and Operating System

- **CPU:** Intel® Xeon® 16 Core
- **OS:** DVEO embedded Linux® on SSD

#### Physical & Power

- **Size – 3 RU (W x H x D):** 19 x 5.25 x 25.2 inches (48.26 x 13.34 x 64 cm)
- **Power Supply:** 3U 760W – Redundant
- **Temperature Range:** Operating: 0°C ~ +50°C on Full Load Storage & Shipping: -20°C ~ +70°C
- **Non-operating Humidity:** 5% to 95% non-condensing
- **Weight:** 39 lbs. (17.69 kg)
- **Conformities:** UL, BSMI, CSA, FCC, CE, RoHS

### Options

- Optional transcoding to H.265
- 4:2:2 10 bit encoding
- Optional DOZER™ Automated UDP Packet Recovery protocol, enabling error-free video delivery over UDP. DOZER ensures smooth MPEG-2, H.264, and optional H.265 delivery through DVEO patented algorithms for automated packet recovery and re-ordering of out-of-sequence packets.
- Optional built-in “Mini Atlas” server supports 1,000+ simultaneous HLS, DASH, and/or RTMP users

### Ordering Information

Gearbox DVB-S-S2 8 Tuners/IP

Other inputs available: Decrypted DVB-S-S2, DVB-T2, 8VSB, QAM, ASI, IP, HD-SDI, and ISDB-Tb
