Real time, highly reliable, 1 RU, quick starting, standards compliant, embedded Linux® based, remotely manageable, one to four channel SD or HD (SDI), H.264/AVC or optional H.265/HEVC TS Encoder. Incorporates a "minimal" Linux® kernel (residing on an SSD) yielding a highly reliable encoder.

Supports most industry standard "protocols" like UDP or RTP with unicast or multicast, and “Wrappers” such as HLS, RTMP, DASH, etc. Audio output is AAC, MPEG-1 Layer II, optional MP3, and/or optional “SurCode for Dolby Digital” AC-3. Supports closed captioning and teletext with overlay.

Encodes both streams with multiple resolutions at .1 to 15 Mbps at popular GOP sizes, frame rates, refresh rates, or aspect ratios. Simultaneously creates high, medium, and low bitrate ABR streams to hand off to your content delivery networks (CDNs) with required authentication, for "One to Many" distribution. Software is scanned for vulnerabilities and open ports. Supports 50 simultaneous HLS users. With optional ATLAS™ add-on, supports 1,000 RTMP, DASH, and/or HLS users natively.

The MultiStreamer DIG/IP 1-4ch: TELCO is the latest version of our flagship cost effective origin encoder. The original MultiStreamer has been in production for seven years and we have shipped over 3,000 units. It is designed as a general purpose workhorse, able to stream several simultaneous streams at different resolutions with any streaming protocols.

The MultiStreamer DIG/IP 1-4ch: TELCO is designed for mission critical applications and features dual power supplies. Inexpensive high volume hardware platforms combined with highly enhanced open source Linux® based software offer great value to all willing to embrace the future. We offer high performance streaming solutions that are based on open source libraries. We enhance the libraries by rewriting critical sections to obtain outstanding reliability and throughput.

This unit is designed to be affordable, scalable, and extendable. Modifications to video formats are easily created. Remote management and multi level security is built in. Recent options include 4:2:2 with 10 bit color space support.
